

Curriculum Vitae

Qi Yan

qi.yan@chp.edu; qiy17@pitt.edu

<https://qiyanpitt.github.io/>

IMMIGRATION STATUS

U.S. Permanent Resident

EDUCATION

- 2018-** **Research Assistant Professor in Pediatrics**
UPMC Children's Hospital of Pittsburgh, University of Pittsburgh, Pittsburgh, PA
- 2017-2018** **Research Instructor in Pediatrics**
UPMC Children's Hospital of Pittsburgh, University of Pittsburgh, Pittsburgh, PA
- 2014-2016** **Post-Doctoral Fellow in Pediatrics** (Mentors: Daniel E. Weeks and Wei Chen)
UPMC Children's Hospital of Pittsburgh, University of Pittsburgh, Pittsburgh, PA
- 2011-2014** **Ph.D. of Science in Biostatistics** (Mentor: Nianjun Liu)
University of Alabama at Birmingham, Birmingham, AL
Dissertation: Statistical Methods for Set-based Association Tests in Genetic Studies
- 2009-2011** **Master of Science in Biostatistics**
University of Alabama at Birmingham, Birmingham, AL
- 2007-2009** **Master of Science in Biomedical Engineering (Bioinformatics)**
University of Alabama at Birmingham, Birmingham, AL
- 2003-2007** **Bachelor of Science in Biomedical Engineering**
Beijing Institute of Technology, Beijing, China

AWARDS

- 2015** **2014 Best Paper Award - UAB from the Science Unbound Foundation**
- 2011** **Research Fellowship Award from Department of Biostatistics**
- 2009** **Research Fellowship Award from Department of Biomedical Engineering**
- 2007** **Research Fellowship Award from Department of Biomedical Engineering**

PROFESSIONAL EXPERIENCE

- 2017-** **Department of Pediatrics, University of Pittsburgh, PA**
Research Assistant Professor/Research Instructor
My active research projects include: 1. Development of statistical and computational methods for high throughput genetic and genomic data; 2. Genetic studies of Age-related Macular Degeneration (AMD), Asthma, Chronic Obstructive Pulmonary Disease (COPD) and Alzheimer Disease; 3. Transcriptome (RNAseq) studies in Asthma and Localized Scleroderma (LS); 4. Deep-learning in AMD risk prediction.
- Develop statistical algorithms and related software packages.
 - Write independent research grants.
 - Collaborate with several research teams, perform statistical analysis and write scientific manuscripts.
- 2014-2016** **Department of Pediatrics, University of Pittsburgh, PA**

Postdoctoral Research

My research projects included: 1. Development of statistical and computational methods for high throughput genetic and genomic data; 2. Genetic studies of AMD; 3. Genetic studies of Asthma and COPD in Hispanics; 4. Investigation of the impact of sequencing errors on family-based gene mapping; 5. DNA-seq, RNA-seq and Methylation analysis

- Develop statistical algorithms and related software packages.
- Collaborate with several research teams, perform statistical analysis and write scientific manuscripts.

2011-2014 Department of Biostatistics, University of Alabama at Birmingham, Birmingham, AL Doctoral Dissertation Research

This dissertation research focuses on developing statistical methods for set-based association tests at both pathway and gene levels in genetic studies. In the first study, we proposed a novel way for pathway analysis that assesses the effects of genes using the sequence kernel association test (SKAT) and the effects of pathways via an extended adaptive-rank-truncated product statistic. In the second study, we proposed an analytical method based on kernel machine regression to be applicable for longitudinal data. In the third study, we proposed an analytical method to be applicable for familial data with various types of phenotypes based on generalized linear mixed model.

- Collaborate with mentor to develop statistical algorithms and associated software packages.
- Perform data analysis and write professional manuscripts.

2013-2014 Department of Biostatistics, University of Alabama at Birmingham, Birmingham, AL NSF Graduate Research

We try to determine whether genetic markers of autoimmunity validated in European and Asian populations influence the occurrence of Rheumatoid Arthritis (RA) in African Americans, determine whether genetic markers of RA susceptibility play a role in radiographic severity in African Americans and develop and test predictive models for RA risk and outcome using clinical and genomic data in African Americans.

- Conducted statistical analysis of GWAS at marker and gene levels.
- Reported research results at internal meetings.

2010-2011 Department of Biostatistics, University of Alabama at Birmingham, Birmingham, AL Master's Thesis Research

We evaluated the influence of race and gender on therapeutic warfarin dose, anticoagulation control and most importantly risk of major hemorrhage from prospective inception cohort of chronic warfarin users.

- Conducted research in interdisciplinary groups
- Reported research results at internal meetings.
- Provided statistical support to medical doctors with their projects and grant preparation.

2010-2011 Department of Epidemiology, University of Alabama at Birmingham, Birmingham, AL Research Assistant

I participated in two projects. 1. A genome-wide association study (GWAS) of carotid atherosclerosis in HIV-infected men. 2. A Comparison of Principal Component Analysis Using Autosomal Variants with Phylogeny Based on Y-chromosome and Mitochondrial Markers.

- Provided insight, regular and ad-hoc reporting backed by solid analysis and documentation.
- Manipulated and maintained large-scale genetic data.
- Worked on multiple large projects to perform in a cross-functional team.

2007-2009 Department of Biomedical Engineering, University of Alabama at Birmingham, Birmingham, AL Research Assistant

We investigated the structural insights for Thrombospondin-1 binding to Calreticulin by using Molecular Dynamics technique.

- Worked with supervisor to investigate the properties of Molecular Dynamics of proteins.

- Reported research results in the manuscripts professionally.

TEACHING EXPERIENCE

2020 spring	Invited Lecturer Statistical Genetics (HUGEN 2080) Genetic Rare Variant Test (2 hours) Department of Human Genetics, University of Pittsburgh, Pittsburgh, PA
2019 spring	Invited Lecturer Foundations of Translational Bioinformatics (BIOINF 2016) Genome-wide Association Study; Analysis of Next Generation Sequence Data (2 hours) Department of Biomedical Informatics, University of Pittsburgh, Pittsburgh, PA
2017 winter	Invited Lecturer Introductory high-throughput genomic data analysis I: data mining and applications (BIOST 2055) Genome-wide Association Study; Analysis of Next Generation Sequence Data; Lab (3 hours) Department of Biostatistics, University of Pittsburgh, Pittsburgh, PA
2016 spring	Invited Lecturer Introductory high-throughput genomic data analysis I: data mining and applications (BIOST 2055) Genome-wide Association Study; Analysis of Next Generation Sequence Data; Lab (3 hours) Department of Biostatistics, University of Pittsburgh, Pittsburgh, PA
2016 spring	Invited Lecturer Applied mixed models analysis (BIOST 2086) Rare-Variant Kernel Machine Test (1 hour) Department of Biostatistics, University of Pittsburgh, Pittsburgh, PA
2015 spring	Invited Lecturer Introductory high-throughput genomic data analysis I: data mining and applications (BIOST 2055) Genome-wide Association Study; Analysis of Next Generation Sequence Data; Lab (3 hours) Department of Biostatistics, University of Pittsburgh, Pittsburgh, PA
2013 fall	Graduate Teaching Assistant Inter Statistical Analysis II (BST612) Department of Biostatistics, University of Alabama at Birmingham, Birmingham, AL
2012 spring	Graduate Teaching Assistant Inter Statistical Analysis I (BST611) Department of Biostatistics, University of Alabama at Birmingham, Birmingham, AL
